

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

"cyclograph" will undoubtedly do much service hereafter. An analysis of the motions of the machine as it passes over obstructions is also likely to prove of value in the promotion of safety, and in the elimination of the "header" from the list of casualties.

A chapter on ball-bearings includes a discussion of the subject by Professor S. W. Robinson, which is a valuable contribution, especially as giving the limit of weight allowable for balls of any given size. The co-efficient of friction for a one-inch ball is given as about 0.00175, as derived from experiments upon the Lick telescope. The book is full of interesting information for the wheelman, and abounds in good reading for all those who are interested in the subject.

Steam. By WILLIAM RIPPER. London and New York, Longmans, Green, & Co. 12°.

THIS is a little primer of steam and the steam-engine. It is a reproduction of notes of lectures addressed by its author to an evening class of young "mechanical engineers" (the term is evidently not applied to the class usually considered to be represented by it in this country), and includes a course of discussions of steam-engines, boilers, and accessory subjects.

Within these two hundred pages are compressed the best compendium of the subject that has yet been published. It is also, so far as we have been able to discover, accurate, and is evidently written by an engineer familiar with the science and the art, and not, as is too often the case where these primers are produced, by an amateur or tyro hardly more familiar with the subject than those to whom his instruction is offered. A preliminary discussion of the physical properties of steam, the chemical principles of combustion, and the elements of thermodynamics, is followed by a brief description of the modern steam-engine, its construction, and its performance, which is really of value, and might well repay the professional for the time required to read it. The book is well illustrated, in the sense of having a good list of engravings, though their quality as specimens of the engraver's art may not be reckoned high, in the opinion of the expert. The compound

engine is described, and its principles summarized, and the book is concluded by a chapter on the management of engines and boilers.

AMONG THE PUBLISHERS.

WE have received No. 30 of "Odds and Ends from the Literary Junk Shop," by A. S. Clark of 34 Park Row, this city.

—"Education as a Factor in Civilization" is the title of an essay by Caroline B. LeRow in the *Modern Science Essayist* for June 15. In the issue of July 1 John W. Chadwick treats of "Evolution and Social Reform," dealing mainly with "The Theological Method."

—Painters—and by this we mean artists, and not carriage or house painters—are not, as a class, persons likely to take interest in the chemistry of paints and painting. Yet it appears that the Royal Academy of Arts in London has a professor of chemistry in the person of A. M. Church, a master of arts, and fellow of the Royal Society; and this same Professor Church has written a "Chemistry of Paints and Painting," which is published in New York by Macmillan. The book is intended for those who use paints, and is meant as a help, that paints and varnishes may be well chosen and properly used. It is not expected that any one will read the book through, but that information will be sought within its covers as occasion may occur. It has therefore happened that to some extent the same matter has been inserted under more than one heading in the book. The book is unique in its field, and should be available to all likely to be interested.

—Mr. Arthur H. Noll has written "A Short History of Mexico," which has been published by A. C. McClurg & Co. of Chicago. The author states in his preface that he has been unable to find any comprehensive history of Mexico in the English language, and he has accordingly endeavored to make up the deficiency. We wish we could say that he has succeeded; but in fact his work is extremely unsatisfactory. He has no intelligent concep-

Macmillan & Co.'s New Books.

Now Ready. Vol. III. completing the work.

A HANDBOOK OF DESCRIPTIVE AND PRACTICAL ASTRONOMY.

By G. F. CHAMBERS, F.R.A.S.

Vol. I. THE SUN, PLANETS AND COMETS.
8vo, \$5.25.

Vol. II. INSTRUMENTS AND PRACTICAL ASTRONOMY.
8vo, \$5.25.

Vol. III. THE STARRY HEAVENS.
8vo, \$3.50.

THE ADVANCEMENT OF SCIENCE.

Occasional Essays and Addresses

By E. RAY LANKESTER, M.A., LL.D., F.R.S. 8vo, \$3.00.

SCIENTIFIC LECTURES

By Sir JOHN LUBBOCK, F.R.S., D.C.L., LL.D. Second Edition. Revised and Enlarged. 8vo, \$2.50.

FIFTY YEARS OF SCIENCE;

Being the Address delivered at York to the British Association by Sir JOHN LUBBOCK, F.R.S., D.C.L., LL.D.
New Edition. 12mo. 75 cents.

MACMILLAN & CO., 112 4th Avenue, N. Y.

APPLETONS' GUIDE BOOKS.

APPLETONS' GENERAL GUIDE TO THE UNITED STATES AND CANADA.

With numerous Maps and Illustrations. New edition, revised for the present season.

In three separate forms: one volume complete, 12mo, morocco tuck, flexible, \$2.50; one volume New England and Middle States and Canada, cloth, \$1.25; one volume Southern and Western States, cloth, \$1.25.

APPLETONS' HAND-BOOK OF SUMMER RESORTS.

Fully revised for the Season of 1890. With Maps and numerous Illustrations. Large 12mo, paper cover. Price, 50 cents.

APPLETONS' DICTIONARY OF NEW YORK AND ITS VICINITY.

An Alphabetically arranged Index to all Places, Societies, Institutions, Amusements, and other features of the Metropolis and Neighborhood upon which Information is needed by the Stranger or the Citizen. New edition, revised and corrected to the present time, just ready. With Maps of New York and Vicinity. Paper cover, price, 30 cents.

D. APPLETON & CO., Publishers,
1, 3 & 5 BOND STREET, NEW YORK.

BOOKS: How to Exchange them for others. Send a postal to the SCIENCE exchange column (insertion free), stating briefly what you want to exchange. SCIENCE, 47 Lafayette Place, New York.

PRACTICAL ELECTRICAL NOTES AND DEFINITIONS.

For the use of engineering students and practical men by W. P. MAXCOK, together with Rules and Regulations to be observed in Electrical Installation Work, with diagrams. 180 pages, 32mo, cloth, 60 cts. E. & F. N. SPON, 12 Cortlandt St., New York.

HEAVEN AND HELL. 416 p., paper. DIVINE LOVE AND WISDOM. 383 p., paper. By EMANUEL SWEDENBORG. Mailed, prepaid, for 14 cents each (or 25 cents for both), by the American Swedenborg P. and P. Society, 20 Cooper Union, N. Y. City.

BOOKS 50,000 vols. of ancient and modern rare and scarce books offered for sale. Send for books tried to obtain elsewhere without success. American, British, German and French Books. Catalogues mailed free to Bookbuyers.

C. N. CASPAR, Book Emporium 437 E. W. St., Milwaukee
